About Me

I'm a 28 year old Canadian with a degree in Math and Physics who has been working in four different countries around the world in the past three years. I love to write and have nearly finished my second novel (the first one still needs major work). I have been teaching, but I miss the numbers. I studied Matlab in university and loved it. Seven months ago I decided it was time for a change and I have been coding all day nearly everyday since. Now I'm ready, so if you want to give me a shot check out my portfolio (joryhagen.com) or send me an:
